

Uptown Construction Update
September 9, 2016

Hollyhurst Construction

Starting September 12 we will begin construction on Hollyhurst. During construction it will become one directional with the southbound lane becoming northbound only for an approximate 12 month construction period.

We will begin by building the duct bank east of the existing poles on Landry's 20 foot dedicated land on the east side of Hollyhurst. We will utilize that 20 feet and the current northbound lane for construction. The project will also include burying public utilities, including Centerpoint, AT&T and others.

Hallmark Construction

Also beginning September 12, manhole construction will take place on Hallmark, between 610 and Hollyhurst. This construction will take approximately 90 days to complete.

We have informed our traffic management team so that an officer will be available at the intersection of Post Oak Boulevard and Hollyhurst to help with traffic flow during PM peak time.

If you have questions, please contact us at construction@uptown-houston.com.

As always, the schedule of activities is dependent on weather.
