

## **Post Oak Boulevard – North Segment Construction / San Felipe to 610**

During the next two weeks between Hollyhurst and 610:

- Our construction work on the northbound lanes placing 7x4 foot boxes to help with drainage will continue from 610 to just north of 777 Post Oak Boulevard (still in the northbound lanes).
- We will bore a sanitary sewer connection from the north bound side of Post Oak Boulevard (Near Prosperity Bank) to the south bound side, midway between the frontage road and Uptown Park Boulevard.
- Traffic signal poles will be removed and replaced with temporary poles.
- Trench work across the driveway between Four Oaks and Camden will be done this weekend.
- Our work on the 12" waterline continues between West Briar and Camden behind the existing curb on the southbound side.
- We continue to prepare the stainless steel arches for their extensions to span the new Post Oak Boulevard.
- Finally, we continue to remove and relocate trees in the median as we move further south on the Boulevard toward San Felipe.

That is all for now. We hope you have a wonderful weekend and enjoy the beautiful weather!
