

Post Oak Boulevard – North Segment Construction / San Felipe to 610

November 4, 2106

During the next two weeks:

- Our construction work on the northbound lanes placing 7x4 foot boxes to help with drainage continues from 610 to just north of 777 Post Oak Boulevard.
- We will finish boring a sanitary sewer connection from the north bound side of Post Oak Boulevard (Near Prosperity Bank) to the south bound side, midway between the frontage road and Uptown Park Boulevard.
- Traffic signal work is going well. Signal timing is being slightly modified to enable smoother traffic flow.
- Our work on the 12" waterline continues between West Briar and Camden behind the existing curb on the southbound side.
- We continue to prepare the stainless steel arches for their extensions to span the new Post Oak Boulevard.
- Finally, we continue to remove and relocate trees in the median as we move further south on the Boulevard toward San Felipe.

Fall should be in the air this weekend. We hope you enjoy!
